

What our customers are saying...

From celebrities and professional athletes, to experts and authors of the nutritional medical world, **Ola Loa** is considered the easiest way to stay healthy. Read what they have to say about Ola Loa, and how they are using our products to help them stay healthy and at peak performance!

VERDINE WHITE of Earth, Wind & Fire writes...

"I have a demanding schedule and on tour it is hard to take care of myself. Travelling from airports, to hotels, to the venues is draining on the system. Ola loa makes it easy and fun. Ola Loa energy not only keeps me from getting sick but also helps me maintain high energy for travel and shows. It's my drink forever.
THANK YOU OLA LOA! "

Author Hyla Cass...

“Ola Loa ENERGY formula is excellent for my patients and readers who want to take vitamins but can’t swallow pills. It contains all the vitamins and antioxidants they need. Ola Loa tastes good and is handy for travel as well. I always recommend the REPAIR formula for my patients with bone and joint issues.”

Hyla Cass, M.D.

—author of *8 Weeks to Vibrant Health* – www.cassmd.com

Doctor and Author JONATHAN V. WRIGHT...

“Ola Loa effervescent mineral/nutrient complex provides a comprehensive powdered supplement especially suited for children who can’t swallow capsules.”

Jonathan V. Wright, M.D. —author of *Dr. Wright's Book of Nutritional Therapy* – www.tahoma-clinic.com

Author and Herbal Pharmacist DAVE FOREMAN...

“You can get great results from using one of my favorite powdered products, Ola Loa. Ola Loa packs what might be equivalent to 12 or more pills into this awesome powder that dissolves (it is actually effervescent) in a small glass of water. Not only are you getting a great multivitamin, but you are also getting high doses of antioxidants as well. Ola Loa was developed by one of America’s leading scientists in the field of Orthomolecular Medicine to fill in the common gaps in our diet and other lifestyle choices.

Need more energy?

The Ola Loa formula includes NAC, and Vitamin C (which strengthen antioxidant and immune function), along with six amino acids, CoQ10, and 40 (90) mineral complexes. Ola Loa is the only vitamin formula that provides you with enough TMG to lower homocysteine and raise SAM-e. While its not widely known, not all forms of a vitamin (S) are the same. For example, most vitamin companies use a toxic form of Vitamin B-12 (cyanocobalamin). Having seen dangerous consequences of cyanocobalamin supplementation, Dr. Kunin only recommends the safe, more effective form of B-12 (hydroxycobalamin).

Ola Loa is so gentle for your system that it can be taken anytime—even on an empty stomach. And because Ola Loa is mixed in a liquid base, the nutrients will absorb better than any pill or

tablet possibly could. This means your body will get the full power of your nutrients, as well as the full value for your money.””

David J. Foreman, RPh, ND.

The DELTA LLOYD Volvo Ocean Racing Team loves Ola Loa...

Ola Loa, really is, amazing stuff. We used it on the Delta Lloyd (Volvo Ocean Race Team) with fabulous results. For up to 24 days at a time our only source of food is in freeze dry form, which made Ola Loa a key fixture in our nutritional supplement program. We lived on ENERGY and SPORT and are hooked on the product.

Matthew Gregory

—navigator, Team Delta Lloyd

Lacrosse player MATT OLGELSBY too..

“Ola Loa gives you the edge!”

Matt Ogelsby
—professional lacrosse player
San Francisco Dragons

And Racing Cyclist JESSE ANTHONY as well...

"With nearly 100 race days completed last year, my body had plenty of chances to be run down. Along with proper diet, I also consistently used Ola Loa to help keep my immune system running high. Staying completely healthy throughout the entire racing season is nearly impossible, but Ola Loa was a significant part of keeping me as healthy as possible and allowing me to perform at the highest level possible. During two of the week-long stage races that I did last year, I caught a head-cold, but Ola Loa gave me with the right vitamins and minerals to be able to fight the sickness and compete through the entire week."

Jesse Anthony

—racing cyclist extraordinaire
